

CHIM BOREY

FRONTEND DEVELOPER

I am an Information Technology student with a strong passion for designing and developing modern web applications. I enjoy learning new technologies and building projects to apply and strengthen my knowledge. Currently, I am focused on React.js, Tailwind CSS, and integrating frontend applications with Spring Boot REST APIs. My goal is to become a Frontend Developer who creates high-quality, user-friendly web applications with clean, responsive designs and outstanding user experiences (UI/UX).

ABOUT ME

I am an Information Technology student with a strong interest in Frontend Development. I enjoy building websites with clean UI, responsive design, and a great user experience. I am currently seeking a Frontend Developer Internship opportunity where I can further develop my technical skills, gain practical experience, and contribute to real-world projects.

PROJECTS

1. E-45 E-Commerce Platform & Management Dashboard 2026
 - Built a responsive e-commerce platform with product browsing, search, shopping cart, discounts, ratings, and order management.
 - Developed an admin dashboard for Overviews, Order, customers, products, inventory, support, setting, security, notification, receipt, and integrations.
 - Implemented reusable UI components and responsive layouts for both customer and admin interfaces.
 - Integrated Resctjs, Tailwindcss, vite
Dashboard: https://ecommerce-45.vercel.app/ecommerce_45
E-45 Demo : <https://ecommerce-45.vercel.app/>
Github : <https://github.com/chimborey/Ecommerce-45>
